

Niyonkuru Jonas

1325 Alviso St, Santa Clara, CA | 520-402-7447 | njonas@scu.edu

Education

Santa Clara University

Sep 2023 - Jun 2027

Bachelor of Science, Computer Science and Engineering, Minor in Mathematics

- **Achievements:** Thomas J. Bannan Award, Koret Fellowship, LEAD Scholar
- **Coursework:** Computer Networks, Object Oriented Programming, Advanced Programming, Cryptography, Web Development, Data Structures And Algorithms, Embedded Systems, Discrete Mathematics, Logic Design, Eletrical Circuits, Probability And Statistics, Calculus 1-4, Physics 1-3

Skills

- Python, C++, C, SQL, React, JavaScript, Rest APIs, Web APIs, AWS, HTML, CSS, Django, ARM Assembly, Verilog, Linux, Visual Studios, Arduino, MATLAB, Google Cloud Platform, DynamoDB

Experience

Elite Lending Group

Jan 2026 - Mar 2026

Software Engineer Intern

Remote

- Built full-stack mortgage features using **React** and **REST APIs**, reducing loan application processing time by **25%** through streamlined UI and workflows
- Developed backend services in **Node.js** to manage loan validation and state transitions, decreasing application errors by **30%**
- Designed and optimized schemas in **PostgreSQL**; improved query performance by **40%** via indexed queries and optimized JOINS

Columbia Sportswear

Jan 2026 - Feb 2026

Product Manager Intern

Santa Clara

- Led planning and on-site execution of Columbia's "Nature Calls" experiential beverage launch during Super Bowl weekend, engaging **2,500+** attendees and distributing **1,000+** product samples, significantly increasing brand awareness through immersive activation
- Coordinated cross-functional teams (event partners, marketing, operations) to launch a consumer-facing outdoor-themed experience at scale

Excite Credit Union

Jun 2025 - Aug 2025

Software Engineer Intern

Santa Clara

- Ran and optimized **SQL** queries with the CFO, delivering actionable insights for financial planning while reducing data retrieval time by 30%
- Produced accurate KPI and loan performance reports that guided strategic decisions, resulting in better financial forecasting and more efficient resource allocation
- Collaborated with the software development and IT team to improve system navigation and enhance the website, helping reduce client wait times and streamline user experience

Elite Lending Group

Aug 2024 - Sep 2024

Finance Intern

Tucson

- Streamlined mortgage qualification workflows by processing **20+** loan applications in Excel and internal underwriting software, reducing document errors and ensuring 100% compliance with underwriting standards
- Conducted personalized outreach to **100+** clients, driving a **22%** increase in loan application completion rates through targeted follow-ups and tailored financial guidance

Projects

Med-Clear

AWS Hackathon

- Built a platform that automates healthcare pre-authorization, using **Amazon Bedrock** to parse insurance policies and review patient records against coverage requirements
- Integrated **Amazon S3** for secure storage and developed a **React** frontend for providers to generate and track insurer-ready packets in real time
- Applied **RAG** pipelines and document parsing to reduce provider workload from hours to minutes, accelerating patient care approvals

Ebay-Lite

- Built a full-stack auction platform where users can list items, place bids, and win auctions, with Buy It Now pricing and automatic winner assignment when the timer expires
- Implemented backend entirely in **C++** using four REST-style API endpoints served as **CGI** executables by Apache
- Built a dynamic single-page application in **JavaScript**, **HTML**, and **CSS**, where UI elements are injected into the DOM at runtime by JavaScript

Link-State Routing Protocol Simulator

- Built a distributed link-state routing system in C where each router independently computes shortest paths using Dijkstra's algorithm, with real-time topology updates propagated between nodes via UDP
- Architected a multi-threaded design (3 threads per router) with mutex-protected shared state to safely handle concurrent cost updates, route recomputation, and network communication

Extracurricular

National Society of Black Engineers

May 2024 - Present

Vice President

- Served as a board member of the NSBE SCU chapter, enhancing resource accessibility for **200+** engineering students by collaborating with faculty and department chairs
- Led an outreach event for over **100** high school students during Engineering Week (EWeek), increasing their interest in technical fields through interactive workshops and presentations
